

YORK® CHARGE ASSURANCE™

THE FIRST BUILT-IN ADVANCED CHARGE MONITORING

YORK® Charge Assurance™ is the key to faster, more accurate installations and more efficient yearly maintenance in our Affinity™ Variable Capacity Residential Systems. The first of its kind as a built-in feature, Charge Assurance™ helps ensure units are correctly charged when installed, providing the homeowner additional peace of mind. Contractors can now quickly determine system refrigerant charge measurements by simply removing two screws – all without disconnecting or attaching anything to the unit.

EASIER INSTALLATION PROCESS:

Charge Assurance™ shortens installation time by building in the tool necessary to confirm the unit is properly charged.

STREAMLINED VERIFICATION:

A digital screen on the corner of the unit quickly displays refrigerant pressures and temperatures contractors need to evaluate the system charge – all without connecting any additional gauges, sensors or accessories. If the screen shows a frowning face, the system requires attention. But if the screen shows a smiling face, the system is operating correctly.

FASTER MAINTENANCE:

By making pressure and temperature information available by simply removing an access panel, homeowners can expect faster maintenance or service calls, increasing contractor productivity.

INTEGRATED MONITORING:

Charge Assurance™ sends an alert to the homeowner and shows the technician if the system requires adjustment. The digital screen displays high side pressure, liquid temperature, low side pressure and suction temperature. With this information, Charge Assurance™ provides direct readout of both system subcooling and superheat.

THE FIRST HIGH-EFFICIENCY RESIDENTIAL SPLIT SYSTEM WITH BUILT-IN, ADVANCED CHARGE MONITORING:

YORK® is the first to introduce Charge Assurance™ – and it's standard in our Affinity™ Series of variable capacity outdoor units. In the future, should the refrigerant charge require attention, an alert is sent to the homeowner. And if the homeowner has the contractor monitoring the system, the servicing contractor will also be alerted.

INNOVATION CLOSE TO HOME

We design, engineer and assemble the YORK® Affinity™ Series line of variable capacity residential systems in the United States, where we can closely monitor and improve processes that directly affect quality. It's this commitment to excellence that allows us to develop new and innovative products in the HVAC industry. That's why, when it comes to home comfort, your confidence is our commitment. Visit www.YORK.com/affinity to learn more.

YORK® residential products carry the Good Housekeeping Seal of Approval.

The YORK® Affinity™ Series YP9C modulating gas furnace received the Consumers Digest Best Buy Award.

The Best Buy seal is a registered trademark of Consumers Digest Communications, LLC, used under license. YORK® products are recognized for quality.
