

Comfortably connected.

Trust the leader in HVAC controls to give your customers complete control – anywhere they go. The YORK® Affinity™ Hx™ Touch-screen Thermostat seamlessly connects with both conventional and communicating home comfort systems to provide local or smartphone-based remote control at the touch of a finger.

Real-time alerts.

When used as part of a communicating system, notifications and plain text alert messages aid in remote diagnostics equipment-side or remotely using the service app.

Service app.

With homeowner permission, a dedicated app can allow you to remotely monitor the system for alerts, view system diagnostics and even make operating adjustments – providing an all-new level of personalized service and support.

Optimized for YORK® systems.

Engineered by the experts at YORK® to provide ENERGY STAR® Most Efficient performance when connected to select YORK® home comfort systems.**

Always up-to-date

Installed systems connected via Wi-Fi® will receive software updates automatically via over-the-air updates – no need to return to the home.

Automatic adjustments.

A selectable auto-humidity feature automatically adjusts humidity level based on indoor and outdoor climate conditions, optimizing comfort while minimizing power consumption.

Complete control at home or away via smartphone

Our Hx™ Thermostat app for iOS and Android gives homeowners the ability to remotely monitor and control their HVAC using a smart device – virtually anywhere with internet access using industry-standard security protocols.

Easy setup and support

If using an Android device, near field communication can be used for initial programming the unit before its even removed from the packaging. A dedicated service app allows for easier initial setup and ongoing, remote support through any device with the service app installed.*

Customer-preferred features

Easy-access home/away modes, intuitive schedule creation and exclusive quick heat/cool settings provide innovative, comfort-enhancing benefits in a compact package.

*With homeowner permission.

**When paired with Affinity™ variable-speed units.
